Sanitized - Approved For Release : CIA-RDP67R00587A000100200001-3

~~SECRET~~

OSA 5738-64

ACTIVITY PROGRAM

31 Dec. 1964

PS # 4-65

25X1A9a [redacted] - X6278

1. Purpose: This equipment constitutes one portion of the terminal equipment required for the data link communications circuits which have been established for OSA supported programs Specifically this equipment permits transmission of signals over leased telephone circuits at the optimum rate of speed commensurate with line quality The associated generators and analyzers are required to assure that the data communications links are optimized as well as for use in the timely and efficient servicing of terminal equipment The quantities of equipment being procured are sufficient to support the five presently programmed data links with two units held in stock for spares or emergency use

2. Description of work or service required:

Procurement action from [redacted] 25X1A5a1

3. Total estimate of cost:

25X1A1a [redacted]

4. Source of funds:

Agency

5. Remarks: 25X1A1a This procurement represents a portion of the total money [redacted] contained in the OSA budget estimate for FY-1965 for Communications Electronics Data Processing Support. It is requested that the Deputy Director for Science and Technology sign the attached requisition as Approving Officer, if approved
